

1. Personal Information

Name: - Morley Evans

City/Town: - Regina

State/Province: - Saskatchewan

Country: - Canada

Email Address: - morleyevans@morleyevans.com

Phone Number: - (306) 584-5379

2. May we contact you regarding your survey? (Please be sure to provide contact information)

Yes

3. State, province, or country where incident occurred

Saskatchewan

4. Year incident occurred

1992 to 2000 inclusive (8 years)

5. Age of patient at time of incident

45 to 53 (8 years)

6. Sex of patient

M

7. In what size community did the incident occur?

Small to mid-sized city (100,000-500,000 population)

Regina

8. What type of medical insurance did the patient have at the time of the event?

Canadian Medicare

9. Who is making this report?

Patient

10. If you are reporting an incident that affects you or a loved one as a patient, but you (or the patient) are also a practicing or retired healthcare professional, please specify your occupation.

No Response

11. For what condition was the patient seeking treatment when the adverse event occurred?

hypercholesterolemia as diagnosed by my doctor

12. (OPTIONAL) what if any chronic or underlying disease did the patient have at the time of the incident? (Examples: cancer, heart disease, asthma or lung disease)

No Response

13. Please list the procedure, treatment or surgery associated with the original adverse event.

Zocor (6 years) followed by Lipitor (4 months)

14. Surgical or procedure-related errors or complications (Check all that apply)

No Response

15. Did the patient get an infection or pneumonia while under medical treatment or in a healthcare-related facility? If not, please skip to Question 19.

No (Please skip to Question 18)

16. Healthcare-associated infection or pneumonia (Check all that apply)

No Response

17. If patient got an infection, please name the bacteria, virus, or fungus involved, if known. (Check all that apply)

No Response

18. If patient had a bloodstream infection or sepsis, please specify the origin of the infection, if known (Check all that apply)

No Response

19. Adverse medication events (Check all that apply)

Medication prescribed for incorrect purpose or at incorrect dosage

My story spans 20 years including the decade it took to recover. It is fully documented and I have written about it extensively. You can see a summary here:

<http://morleyevans2.com/Depraved/Depraved.html> There was nothing wrong with me. I had started a weight-training 12 months before I went to my doctor (John N. Alport, MD) who said he had something that would improve my health. He said I was in danger of having a heart attack because my cholesterol was so high.

20. If patient experienced an adverse medication event, please give the medication(s) involved and briefly describe what happened to the patient.

Zocor and Lipitor to lower my cholesterol. Other meds to relieve their side effects: notably antidepressants (Elavil), and analgesics (Naproxen). Along with a long list of meds, I had over 100 referrals for pain after Alport admitted I was in pain after four years of denying it.

21. Did the patient have a complication associated with childbirth? If not, please skip to Question 25.

No Response

22. Complications in infant at birth (Check all that apply)

No Response

23. Childbirth-related complications in a mother (Check all that apply)

No Response

24. If the patient experienced a childbirth-related complication, please describe the conditions of the birth and interventions used (Check all that apply)

No Response

25. Other complications or errors in diagnosis or treatment (Check all that apply)

Misdiagnosis

Hypercholesterolemia is an imaginary disease invented by the drug companies.

Cholesterol lowering drugs are the most profitable pharmaceutical drugs in history. \$29 billion dollars annually are made by diagnosing and selling these drugs alone. More is made selling nostrums to treat the "side effects" they cause. I was almost killed after being an old man when I was 45 years old. I am one of hundreds of thousands, if not more, world-wide, who have been ravaged by this scam and its criminal perpetrators.

26. Accidents or failure to properly supervise the patient (Check all that apply)

<http://morleyevans.blogspot.ca/2013/03/another-legal-opinion.html>

27. PATIENT OUTCOME FROM EVENT (Check all that apply) (Please briefly provide details in the box at the end of the question)

Financial loss

By the Grace of God, I have recovered thanks to diet and exercise. I lift weights three times a week. I am getting stronger. My blood pressure is 100/63! (It was always very good.) I am healthier today than I ever was in my previous life.

28. What was the effect of the event on the patient's family and significant others?

(Check all that apply)

Emotional trauma or Post-traumatic stress (PTSD)

Financial loss

Loss of employment

Loss of lifestyle

Loss of home

I am extremely angry about what was done to me. These morons threw away 20 years of my life. I am even angrier that authorities could not care less about it. This indicates that Dr. Alport is not unique and that this is a systemic problem that harms everyone. Medical costs are completely out of control, yet medicine has no answers to today's health problems. Criminals run the Health system. Heads will roll.

29. If the patient experienced financial loss or had to utilize additional resources, please categorize the type of expenditure. (Check all that apply)

Personal expense (out-of-pocket or use of savings)

Personal expense (private loan or bank loan)

My sister saved me from incompetent hospital staff when I was in a coma. She provided me with a home when I was discharged. My recovery was very slow and the medical system was zero help. They all can go to Hell — the entire over-paid gang.

30. WHERE DID THE EVENT HAPPEN?

Doctor's office or other healthcare provider's office

31. PERSONNEL INVOLVED (Check all that apply)

Primary care physician

Surgeon

Pharmacist

Chiropractor

Emergency Medical Responders (EMS)

I saw over 30 doctors during the course of my illness. Only Dr. Cenaiko correctly diagnosed my problems as having been caused by Zocor and Lipitor. Apparently the other doctors cannot read what Merck and Pfizer tell them about the drugs they prescribe.

32. CONTRIBUTING FACTORS TO THE ADVERSE EVENT (Choose as many as apply)

	Did not occur or not applicable (1)	Occurred, but not a serious problem (2)	Serious problem in patient's care (3)	Major factor affecting patient outcome (4)
Patient was not given the information needed to make an informed decision				X
Healthcare personnel did not listen to patient or family				X
Patient was not properly monitored				X
Nurse did not respond				

quickly to the call button	
Doctor was slow to arrive	
Healthcare personnel did not communicate well with each other	
Healthcare personnel seemed untrained or lacking in knowledge	X
Healthcare personnel seemed over-confident	X
Healthcare personnel seemed overtired or fatigued	
Healthcare personnel seemed overworked, rushed, or behind schedule	
Healthcare personnel did not seem familiar with the patient's case	X
Healthcare personnel did not communicate important information to patient	X
Healthcare personnel did not seem concerned about the patient	X
Patient's room not cleaned properly, environment not sanitary	
Healthcare personnel did not follow sanitary procedure	
Medical procedures or treatments were not performed carefully	X
Premature discharge	
Lack of follow-up after discharge	
Other (please describe below)	X

Other contributing factors/Comments: Any fool can practice medicine in Regina once he is a member of the club. Regina, Saskatchewan, Canada may have the worst and most expensive medical system in the world.

33. HOW DID YOU LEARN WHAT HAD HAPPENED? (Check all that apply)

My only clue was provided by CBS news that reported (once) in August 2001 that Baycol had been withdrawn from the market. I kept detailed records of the years of my misery and spent a year reconstructing what happened and building a case.

34. HOW DID THE FACILITY OR HEALTHCARE PROVIDER RESPOND? (Check all that apply)

Denied responsibility

In Canada, doctors cannot be sued. Malpractice is forced into the "legal" system which is owned by the CMPA and the CMA. Pharmaceutical companies are better protected than the Mafia, which is protected.

35. Do you feel that the patient or patient's family members later had a difficult time getting medical care because of the adverse event?

No

No yet, although I don't use the medical system very much for obvious reasons.

36. Did the patient or family consider suing over the adverse event?

Yes (please answer Questions 38 - 45)

37. If the patient or family DID NOT want to sue, what were the reasons? (Check all that apply)

No Response

38. If the patient or family DID want to sue, what were the reasons? (Check all that apply)

Patient/family wanted to hold the responsible parties accountable

Patient/family wanted to sue because of the financial losses they had suffered

Patient/family were angry at the way they had been treated by the provider or facility

Patient/family wanted to be sure that the same thing did not happen to someone else

I know what happened. Too bad Canada doesn't have a legal system.

39. Did the patient or family consult a lawyer concerning the adverse event?

Yes (Please answer Questions 40-45)

40. If the patient or family consulted a lawyer, what was the outcome of the interaction with the attorney? (Check all that apply)

I could not find a lawyer. I advertised across Canada. Lots of American lawyers responded but no Canadian lawyers. They know the score in Canada

41. If the patient or family pursued legal action, what was the outcome of the case?

(Check all that apply)

Lawsuit was dismissed

The judge who dismissed my case, with a chuckle, was Larry Kyle (now retired). Larry Kyle had been my family's lawyer for decades. This is just one more example of the Canadian kangaroo court system. It is a joke! Oh yes! The transcript of Discovery was edited too. So the court reporter outfit (Royal Reporting and Court Transcripts) that signed it as a true and accurate report of what happened committed perjury! How corrupt is that? They told me they had erased the tape when I asked for it a few days after the proceeding. Virtually every medical case in Canada is dismissed out of hand.

42. If the patient or family settled a case, did they sign a confidentiality clause agreeing not to discuss any of the following? (Check all that apply)

No offer was ever made. They must know that I will never settle for any amount. I'll see them burn in Hell.

43. If the patient or family signed a confidentiality agreement, what was the reason for signing?

No Response

44. If the patient or family pursued legal action (with or without success), how long did the legal process last?

My friend who is a lawyer helped me fill out the papers and represented me in court. He is young and thought we had a chance — we didn't. I spent about 7 months.

45. If the patient or family received a legal settlement or other financial compensation, how much did they receive after medical liens, subrogation of medical expenses, and legal expenses?

0

zero, nada, zippo, f••k-all

46. To what agencies and institutions, if any, did the patient, family, or other individuals report the adverse event?

Reported to the Food and Drug Administration (FDA)

Reported to the Institute for Safe Medication Practices (ISMP) or ConsumerMedSafety Ombudsman or Patient Relations

Canadian Health Authority

Canada - Provincial Minister of Health

Health Canada, Saskatchewan Department of Health, College of Physicians and Surgeons of Saskatchewan, Canadian Medical Association, Canadian Pharmaceutical Association, Saskatchewan Pharmaceutical Association, FDA, Saskatchewan Minister of Health, Premier of Saskatchewan, Saskatchewan Ombudsman, Regina Leader Post, CBC, CTV, W5, Law Society of Saskatchewan, Canadian Bar Association.

47. Were you satisfied with the response of the institutions or agencies to which you reported the adverse event?

No

Are you kidding?

48. NARRATIVE (Please give a brief description of the incident and any additional comments or suggestions you have for how the incident might have been prevented.)

NARRATIVE:

I was in a coma after I had been tortured for eight years. It took me twelve years to recover through my own efforts at my own expense. No one in authority in Canada could care less what happened to me. They do not care at all, at all. Dr. John N. Alport, MD, continues to practice medicine as an insurance company doctor who works for SGI and lies for them in court so they can weasel out of paying insurance claims. Company employees refer to Alport as "doctor death" whom they see because they are forced to. Alport is a lazy incompetent fool who writes prescriptions for drugs he knows nothing about (apparently). Dr. Cristo (Chris) Annandale, MD, skipped town when I mailed him a letter that indicated I had figured out what he and Alport had done. Annandale now practices medicine in Banff. A few years ago a man in South Africa contacted me to reveal that Dr. Annandale has been convicted of running an art fraud scheme in South Africa. This victim of Annandale thought he would create lots of trouble for Annandale in "a fine country like Canada" by exposing Annandale as a convicted criminal. I told him not to hold his breath because Canada loves and protects criminals. Annandale is safe in Canada, unless a grizzly bear in Banff eats him. I can thank Dr. Frederick Cenaiko

for saving my life the first time when he said "I don't know why you are taking all these drugs. Stop." and Dr. Buwembo for saving my life the second time when he drilled a hole in my head to relieve a subdural hematoma. I can curse Dean Ast who sold me all the Drugs that Alport and Annandale prescribed along with all the other drugs my family bought for fifty years from Ast's drug store Hill Ave Drugs. My mother told me she always thought Dean Ast's father, Harold Ast, was a sneak. Why we were loyal customers all those years is a mystery now. Finally, Larry Kyle made lots of money processing my mother's company's thousands of real estate transactions for decades. I can thank my friend Robert MacKay who is one of Canada's few honest lawyers.

49. CONSUMERS UNION This survey was created in a joint collaboration between The Empowered Patient Coalition and the Consumers Union Safe Patient Project (www.safepatientproject.org), which welcomes input from those who would like to share their stories of medical harm. The Consumers Union Safe Patient Project seeks to eliminate medical harm through public disclosure of patient safety events such as hospital-acquired infections and medical errors, as well as information about health care providers, the safety of prescription drugs and problems with medical devices. May we share your story with Consumers Union?

Yes

50. Are you interested in sharing your story with members of the media reporting on health care issues? If so, please be sure that you have entered your contact information above or enter it in the box below.

You bet: Morley Evans; (306) 584-5379; morleyevans@morleyevans.com; 3712 Queens Gate, Regina SK S4S 7J1

51. Patient Harm Questionnaire from Propublica. Please consider filling out an additional survey sponsored by Propublica at <http://www.propublica.org/article/patient-harm-questionnaire>

Will do.

52. Thank you for completing our survey. Please tell us if you have suggestions for improving our reporting process and please alert others who may have experienced adverse events to complete the survey. For more information or to see survey results, please visit www.EmpoweredPatientCoalition.org.

I can turn you on to many more. I hope you will send me a copy of this.
